SVMi-4E
Integrated Voice Processing Platform

Built with the reliability and features found in larger systems, the SVMi-4E is specifically designed to function with the Samsung iDCS 100, DCS Compact and DCS 50si key system products. With 4 ports standard, up to 100 mailboxes and a full Auto Attendant, the SVMi-4E offers the highest level of professionalism to your business, providing immediate, personalized and unobstructed access to callers.

The SVMi-4E not only becomes part of the phone system, it offers intelligence far beyond that of other voicemail systems. Easy to install and even easier to maintain, it has no moving parts, making it incredibly reliable.

Using the latest in Compact Flash memory technology, the SVMi-4E provides up to 2.5 hours of message storage, supports Network Mailboxes and provides multi-language support for 12 available languages (English, Spanish, and French come standard). Combine the features of the SVMi-4E with the functionality of a Samsung phone system and you can't help but be impressed. Make a sound investment in your future with the SVMi-4E, and watch it help your business exceed everything you dreamed it would be.

Highlighted Voicemail Features

Answering Machine Emulation Monitor while messages are being left in your voicemail box through the speaker of your keyset just like screening a call on your home answer machine.

Broadcast Authorized personnel can broadcast a message to everyone in the system.

Call Back Press one key and automatically call back the person who left you the message.

Date and Time Stamp Each message received is date and time stamped upon arrival.

Direct Messaging / Quick Memo Easily leave a message for yourself or another person without calling the extension first.

External Notification When you have messages in your mailbox, you are alerted at your cell phone, home phone or a pager.

Individual Mailbox Greeting Each mailbox has its own personalized greeting recorded in the station user's voice.

Message Scan Easily scan your messages. The first few seconds of each message will be played, and then it will go to the next message.

Message Fast Forward and Rewind Easily skip through a message if you are looking for a specific piece of information.

Message Forward With Append Messages can be forwarded to other mailboxes in the system with introductory remarks.

Message Pause Pause the messages at any time while listening to your messages.

Message Retrieve Any sent message can be canceled before the recipient has received it.

Message Skip While listening to any message, you can quickly search for any message, and still save all the messages as new.

Message Undelete Retrieve messages that have been previously deleted that day. No more losing valuable messages by pressing the wrong button.

Message Waiting Light Indication An instant indication on your keyset tells you when you have new messages. Press one button and connect with your voicemail.

Multiple Language Support System and mailbox prompts can be individually set to a specific language.†

New or Old Message Selection Access your mailbox and choose to listen to either new or old messages.

Personal Mailbox Administration Change settings for your mailbox any time you like, from any phone anywhere in the world.

Selected System Features

Alphabetic Directory (Multiple) Callers who do not know your extension number, but know your name, can enter the first few letters of your name and then easily be transferred.

Automatic After Hours Answering The main greeting changes from the day to night greeting automatically.

Caller ID Compatible If you have caller ID, the SVMi-4E captures the caller ID and saves it with each message, making it easy to call back the person leaving the message.

Incoming Call Overflow You can answer any or all lines immediately or answer only the calls that your operator does not pick up.

Keyset Display and Soft Key Navigate through the SVMi-4E menus using the keyset display and the soft keys below the display to respond to prompts.

Recordable System Prompts Add or record selected prompts to suit your particular business.

Subscriber Administration The System Administrator can create, delete, and/or modify subscribers. If you select to modify a subscriber, you can reset their password, record their name, enter the directory name, and record their mailbox greeting all from the same utility.

Synchronized Clock Changing between day and night modes is always synchronized with the phone system.

---

* Remote Programming requires use of external modem sold separately.

† 12 Languages are available. 9 simultaneous languages are supported.
   Ask your Authorized Samsung Dealers for details.

Features subject to change without notice.
